# Hi :) I am Vrinda Mittal.

I am a computer science enthusiast currently pursuing Computer Science and Applied Mathematics at IIIT Delhi. My interests lie in the field of cryptography ,cyber security and web development.

Besides this I am also fond of reading books, painting, solving sudokus and watching movies in my free time.

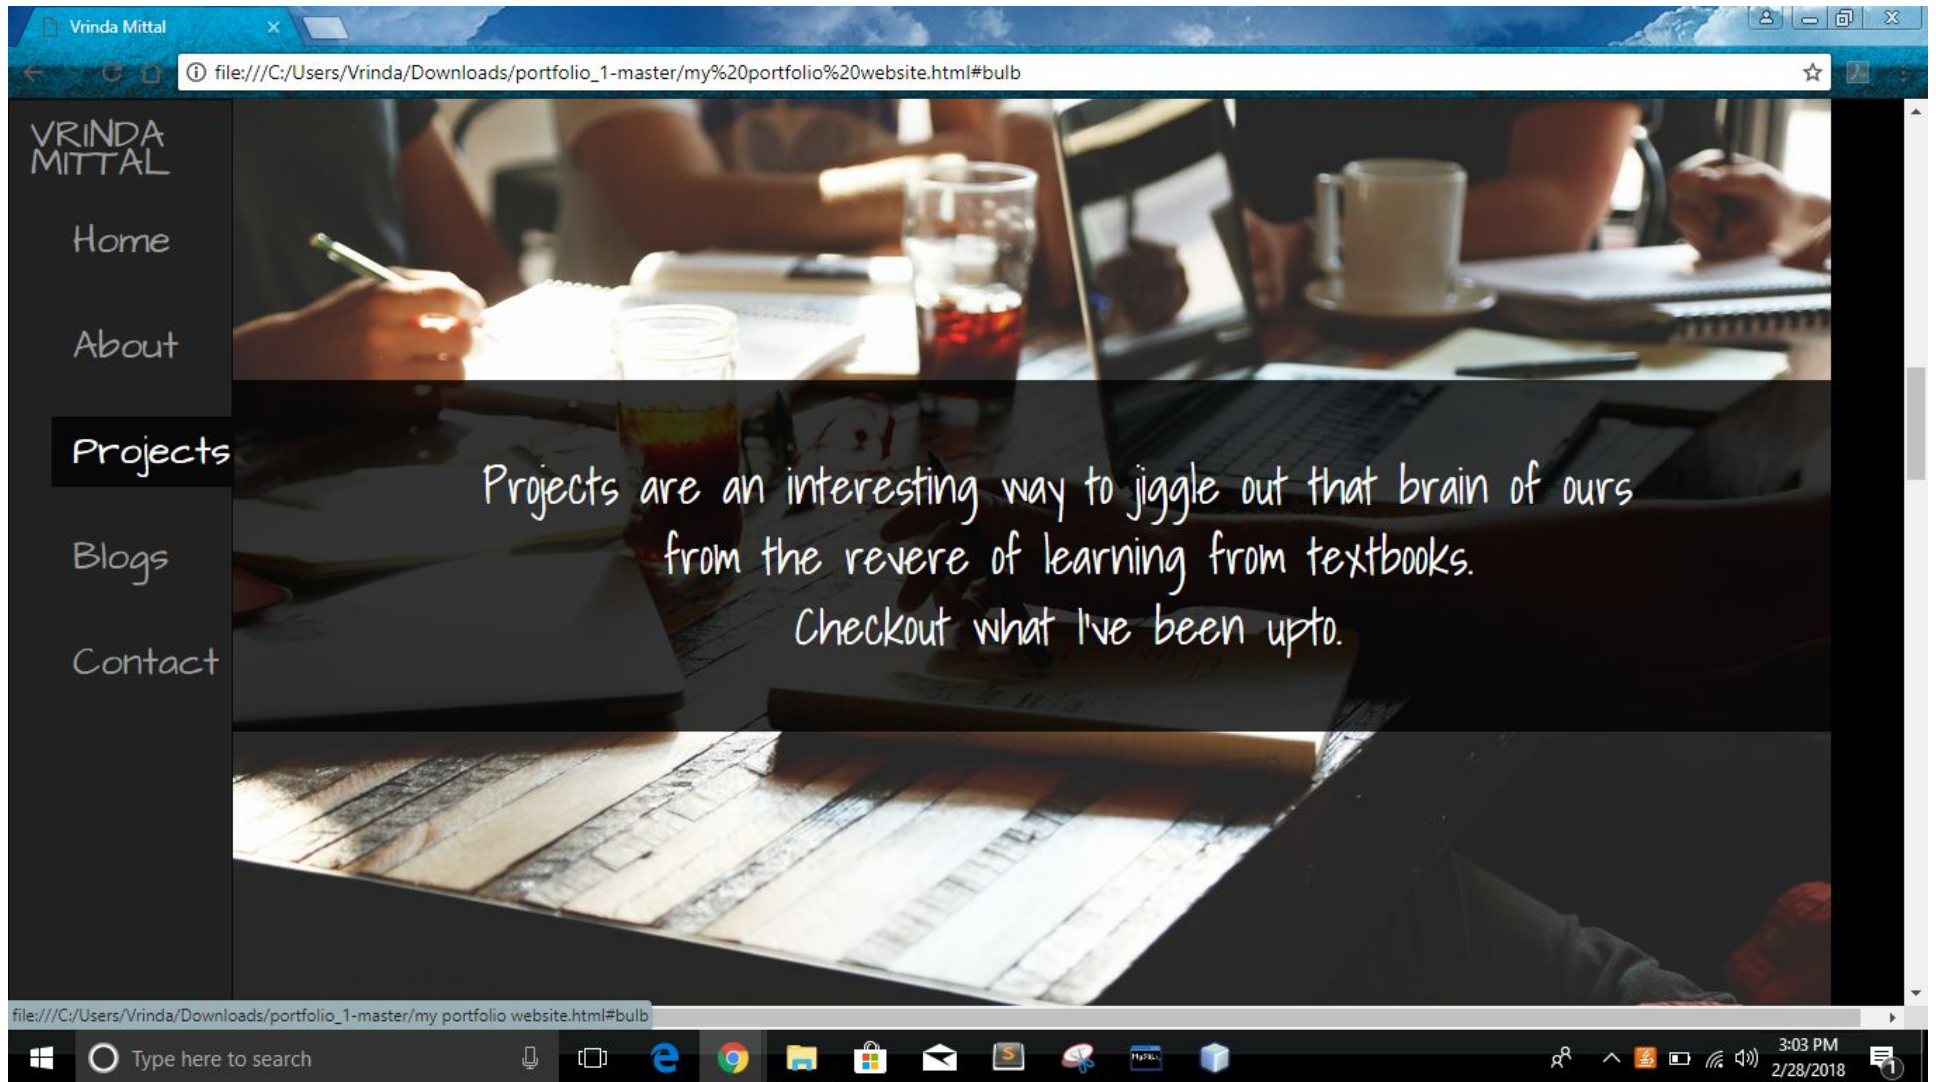

Sometimes a bit eccentric but a wanderer by heart. I love going to the mountains for vacations.

## Creative Learning

This was a group project in which we had to explain a topic from the Systems Management course at IIIT Delhi. We had to present it in a creative way by means of a video. We did it on **"Remote Administration"**

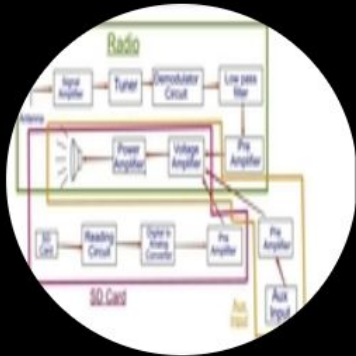

## Mini Project

In this group project we figured out the dynamics behind a typical Search Engine and built our very own prototype. Our Search Engine **"Quest"** is currently able to crawl IIIT Delhi's official website. (www.iiitd.ac.in)

## How Stuff Works

This too was a group project. This time we tore down a **"Portable Music Player"**, identified its various components and tried to figure out the basic working behind a typical music player
